FUCHS 700NBF SEMI SYNTHETIC COOLANT

Superior non-foaming, biostatic water miscible cutting fluid

With over 90 years experience in lubricant formulation, Fuchs has developed this unique non foaming water dilutable cutting fluid. ECOCOOL 700 NBF is designed to meet the increasing demands of industry. It is especially well suited to applications where clarity and foam control are critical, forming a clear translucent solution in water, free from chlorine, nitrates and phenols.

ECOCOOL 700 NBF (M) is suitable for the machining of all * ferrous and non-ferrous metals, from general to arduous machining applications.

QUALITY OPTICAL REFRACTOMETERS

Maintaining the correct concentration of coolant increases productivity and saves money. If coolant is under concentration it can cause reduced tool life, machine or part corrosion and encourage bacterial growth. Refractometers help to determine the concentration of water based coolants.

Analogue refractometer, place a sample of the coolant on the glass window and view the concentration in the eyepiece
