DELTA POINT SETS WITH BONUS HSS STEP DRILL

HSS-M2 DELTA POINT ~ DRILLS FASTER, LASTS LONGER

The Delta Point drill bit is completely unlike traditional chisel point and split point drill bits. Delta Point drills have a multi-faceted cutting tip. The overall length of the cutting edge of Delta Point significantly exceeds that of conventional split point drills of comparable size. Although the final design might look complicated the results are simply extraordinary.

BRIGHT JOBBER DRILL SETS

WITH BONUS MVRK STUBBIE EDC FOLDING KNIFE

HSS-M2 118° SPLIT POINT

Split point is self centering and reduces the need for end thrust. Friction at workpiece is reduced. 118° point angles are ideal for use in materials such as mild steel and cast iron. The 118° point creates easily controlled chips which are wide and thin. Bright finish tools have no surface treatment and are supplied in the as-ground condition. These tools are suitable for general purpose use, particularly for non-ferrous applications.

METRIC HSS BRIGHT FINISH WITH BONUS KNIFE

	SPECIAL
2007-M2-C18 1.0-10.0MM X 0.5MM	\$91.60

THE MVRK STUBBIE ULTRA COMPACT EDC KNIFE is small in size but big on features. The strong magnet ensures it stays where you left it- on the fridge, the trailer or stuck to the 4WD. The heavy duty bottle opener ensures you never get caught short. An ultra glide bearing system allows smooth, easy, manual opening without the need for mechanical assist.

PREMIUM COBALT DRILLS FOR HARD MATERIALS

HSS-Co5 (COBALT) 135° SPLIT POINT

The 135° point provides superior performance in harder steel materials especially in deep hole applications. In these situations it will produce thicker chips minimising work hardening of the cavity. Faster penetration reduces abrasion and friction along the cutting edges. Cobalt HSS drills are extremely hard and provide superior performance and increased tool life especially in stainless steel and high tensile steel.

METRIC HSS-Co5 BRONZE FINISH

	SPECIAL

118° NOTCHED POINT 30° HELIX

Bordo reduced shank HSS drills are ground and then a black finish is achieved by steam tempering, a thermal process resulting in a porous tool coating. This surface aids chip flow and heat dissipation. The drill is then ground a second time to achieve a bright finish on the shank and cutting edges.

TUNGSTEN CARBIDE TIPPED HEX SHANK MASONRY DRILL SET

Specifically engineered for use in impact drivers these bits are also fully compatible with conventional rotary drills. 1/4" hex shank facilitates fast tool loading in cordless impact drivers and quick change adaptors. Suitable for use in: concrete, brick, block and stone.

TUNGSTEN CARBIDE TIPPED HEX SHANK CERAMIC TILE DRILL SET

These Rotary Only ceramic tile drills provide outstanding performance and extended tool life in hard ceramic materials. They feature a unique cutting edge geometry in conjunction with high temperature brazing to ensure reliable and accurate drilling in multiple hole applications.

UNIVERSAL DRILL SET

Special cutting edge geometry with a diamond-ground carbide tip. For use in masonry, natural stone, artificial stone, ceramics, steel, metal, wood, PVC, acrylic, glass, tiles, hard burnt brick. Not for hammer action.

STEEL WIRE

These brushes are suitable for a range of general applications in the paint, welding, and automotive trades. They are constructed using tempered steel wire and are the most economical general purpose brush.

STAINLESS STEEL WIRE

Stainless steel wire scratch brushes are primarily used for metal finishing on smooth surfaces such as plating. The stainless steel wire is non-corrosive and suitable where hygiene requirements are a consideration or where moisture is present. Stainless steel wire scratch brushes are predominantly used in the welding or painting industries. Stainless steel wire resists oxidation and rusting.

SCREW EXTRACTOR SET 9900-SM2

Chrome alloy spiral screw extractor set with left hand drills.

- Coarse-pitched tapered screw thread.
- Sizes 1-5.
- Matching HSS-Co5 (Cobalt) left hand drills.

SCREWOUT SET 9901-S1

For the rapid removal of damaged screws & bolts.

- Removes #4 to #14 Screws.
- Removes 5.0mm to 8.0mm Bolts.
- Removes #10 to 5/16" Bolts.

SQUARE SCREW EXTRACTOR SET 9904-S1

Chrome molybdenum square screw extractor set.

- Sizes 1-5.
- Four sided sharp undercut edges to provide a solid grip and will not expand damaged fastener during extraction.

IMPACT RATED 3/8" SQUARE DRIVE BOLT EXTRACTOR SOCKET SET

This set covers 9 common socket sizes from 8 to 19mm and their chrome molybdenum steel construction ensures a long tool life even in the toughest conditions. The bolt extractor sockets feature a 3/8" square drive and are suitable for use with a 3/8" breaker bar or ratchet.

- 8, 10, 11, 12, 13, 14, 16, 17, 19mm sockets.
- Heavy duty chrome molybdenum steel construction.
- Standard socket 3/8" square drive.
- Rated for use with impact drivers.

BI-METAL HOLE SAWS

Bordo bi-metal hole saws are premium quality, general purpose saws suitable for a wide variety of materials and applications. The high-speed steel cobalt (HSS-Co) cutting edge provides shock resistant teeth and resists tooth strippage. 4/6 positive tooth configuration allows for fast, smooth cuts and less vibration.

FEATURES

HSS-Co Cobalt cutting edge.
4/6 variable tooth configuration.
48mm (1-7/8") depth of cut.
5mm (3/16") thick heavy-duty backing plate eliminates need for drive plate.

\$138.40
Part No. 7096-200A

ADJUSTABLE HOLE CUTTER

Quickly and safely cut large diameter holes in a wide variety of materials from 40 to 200mm.

- Simple to adjust and built to last.
- Supplied with two types of replaceable tungsten carbide blades.

RIPPER HEAVY DUTY TUNGSTEN CARBIDE TIPPED HOLE SAWS

Ideal for cutting timber and all types of composite board, particularly MDF. Ripper hole saws are also suitable for cutting wood laminates, plywood, insulation and fibre cement sheet.

FEATURES

Heavy duty abrasion resistant tungsten carbide teeth will cut materials that quickly dull normal hole saws. Heavy duty construction for long life with large gullets for easy slug removal.

RIPPER TCT KITS

7075-S1	9 SAWS – 25 TO 64MM	SPECIAL \$291.60

TUNGSTEN CARBIDE HOLE SAWS

XP TCT hole saws are ideal for repetition cutting in steel plate, stainless steel plate and synthetic resin plates up to 4mm thick. XP2 TCT hole saws feature 3 edged cutters which balance the cutting effort for smoother boring, greater control and reduced drag. The deep body makes them ideal for use with curved surfaces such as metal pipes.

FEATURES

Extremely long service life.
No need for messy cutting fluids.
Heavy duty plug ejector spring.

HSS ANNULAR CUTTERS

Annular Cutters achieve burr-free finished holes without the need for pre-drilling or step drilling. Faster and more accurate than using standard HSS twist drills. Bordo Annular Cutters are CNC ground and feature multi-cut geometry for smooth and fast cutting. The precision ground flutes run the entire length of the cutter providing efficient chip removal.

FEATURES

Extended tool life.
Close tolerance drilling without runout.
Reamed quality, burr free finished holes.
Universal shank suits all popular machines.

ANNULAR CUTTER KITS

7400-S1X50	50MM CUT DEPTH 14 TO 25MM	SPECIAL \$401.40

THINWALL SHEETMETAL HOLE SAWS

Ideal for the electrical and plumbing tradesman. Each hole saw has a thin 0.65mm sidewall blade thickness, which allows for faster cutting and longer battery life. Ideal for chargeable impact drivers. Smooth and fast cutting — especially designed tooth geometry assures increased performance and better wear resistance.

FEATURES

M42 material with special variable pitch tooth design for smoother cuts in sheet metal.
Self ejecting plug removal.
1/4" quick change shank, ideal for use with battery operated impact drivers.
Safety collar stop helps prevent cutting too deep, and prevents damage to wires when drilling into electrical boxes.

They feature a unique cutting edge geometry in conjunction with high temperature brazing to ensure reliable and accurate drilling in multiple hole applications. Use of water cooling will extend bit life. Although these drill bits are not recommended for drilling vitrified porcelain, their superior multi-facet tungsten carbide tip enables them to drill most materials of this type, albeit with a reduced tool life. These ceramic tile drills can also be used to successfully drill in brick, concrete and other masonry materials.

BRILLIANT DIAMOND HOLE SAW KIT

Saws feature a M14 thread for use on an angle grinder. Mandrel allows saws to be used in a pistol drill. Sizes up to and including 25mm feature a wax filled core that lubricates the cutting edge allowing dry, water free, drilling.

BRILLIANT DIAMOND CORE DRILLS 1/4" HEX SHANK SET

The wax filled core lubricates the cutting edge allowing dry, water free, drilling.

rapidcut®

- Ultra thin kerf for faster, effortless cuts.
- Tru-plate fully hardened and tempered steel body is precision balanced to run truer.
- High performance diamond ground carbide for improved cutting efficiency – sharper for longer!
- Nano-shield coating reduces friction for reduced saw load, resists gumming keeping blade cooler and extending blade life.

tradecut®

- Heavy duty anti-kickback tooth shoulders which provide optimum support to the cutting tips ensuring maximum performance, extended blade life and safer cutting.
- Fully hardened & tempered steel body resists warping even in the most demanding applications.
- High performance diamond ground carbide for improved cutting efficiency – sharper for longer!

multicut®

- Extreme performance titanium carbide metal cutting teeth provide long blade life.
- Cuts multiple materials including timber, ferrous metal, non-ferrous metal and plastics.
- Cool cutting, no heat, no burrs and minimal sparks when cutting metal.
- Dust free metal cutting. Unlike abrasive cutting wheels multicut blades create chips not dust.

TYPHOON IMPACT SOCKETS

- High strength chromium-molybdenum steel (Cr-Mo) construction for strength, toughness, and superior wear resistance.
- Impact rated design - specifically engineered to withstand high torque and vibration generated by impact tools.
- Thick socket walls help absorb and dissipate shock reducing the chance socket failure.
- Black phosphate finish corrosion resistant coating extends tool life.
- Precision machined for a tight tolerance fit on fasteners - reducing tool anvil, socket and fastener wear.
- Available in standard and long lengths to suit various applications.
- Retention holes and grooves for use with retaining rings that index in the retention holes on the tool anvil and socket at the correct location to maximise safe retention of sockets.

SPIRAL FLUTE TIN COATED STEP DRILL 4-32mm

saber

Saber general purpose cobalt bi-metal hole saws have a 38mm depth of cut and are suitable for a wide variety of materials and applications. The cutting edge provides shock resistant teeth and resists tooth stripping. 4/6 positive tooth configuration allows for fast, smooth cuts and less vibration.

SABER S2 & S3 QUICK CHANGE SETS

Each saw in the set is fitted with a quick change adaptor. In the smaller saws the adaptor includes holes for the mandrel drive pins. In the large saws the mandrel drive pins engage directly with the holes in the back of the saw body. Simply retract the mandrel collar and slide the saw in place. Align the drive pins with the adaptor or saw body. Release the collar and it securely locks the saw in place. Fast and simple saw changes!

SlickDTR

DRILLING, TAPPING & REAMING FLUID

SLICK DTR DRILLING TAPPING AND REAMING FLUID - 250ML BOTTLES

SlickDTR is formulated with extreme pressure additives that significantly reduce friction at the cutting edge, extending tool life, increasing performance and producing a superior finish. SlickDTR is suitable for use on all metals including hardened steels, titaniums and nimonics.

- Fully biodegradable

\$21.30
Part No. 8200-CF250

Goliath Semi-Synthetic Water Soluble Long Life Cutting Fluid (High Performance) easily mixes with water to give a low odour, biostable Extreme Pressure soluble cutting fluid providing excellent corrosion protection, lubricating properties, and a proven sump life in excess of 12 months, without the need for biocide addition.

Rapid Tap® All Metal Cutting Fluid USA Made Relton Rapid Tap® greatly extends tool life with superior lubricating and cooling properties. Rapid Tap® creates a super fine machined finish operation after operation. Excels in tough materials. Contains no 1,1,1- trichloroethane or other ozone-depleting chemicals.

Stick-Kut Relton Stick-Kut is a blended wax stick designed for use in applications where liquid coolants are not feasible or desirable. Suitable for use on aluminium, brass, plastic, ferrous, and non-ferrous materials.

AUGER EXTENSION SET

Bordo 3/8" x 300mm quick change extensions suit all accessories with 3/8" shank and power groove. Extensions are securely joined together by rotating the threaded quick change locking collar – no threaded rods to come undone!

Extends your reach up to 1,700mm. Set contains 1 x 25mm high carbon steel, heat treated Auger Bit with coarse screw point and 6 x 300mm Quick Change Extensions.

PREMIUM QUALITY TUNGSTEN CARBIDE BURR SETS

EXPRESS CUT, INOX FOR STAINLESS AND NON-FERROUS CUT

All Bordo burrs are CNC machined for consistently high quality, and offering the latest cut technology, the new Corner Radius Burrs are suitable for use on a wide range of metals, alloys and other materials including titanium, bronze, stainless steel, cast iron and brass. Manufactured and inspected to strict standards from sintered tungsten carbide, its novel design cuts better and lasts longer, giving you a more cost effective and efficient solution for difficult to machine materials.

E-Z CHAMFER M2-HSS CHAMFER TOOL

Create a perfect chamfer for:

- starting a nut on a bolt or threaded bar.
- starting a button die or die nut on rod.
- creating a leading edge on timber and dowel.

E-Z Chamfer efficiently removes burrs and ridges from bolts, pipe, threaded rod, bar and dowels. It is suitable for use on mild and hardened steels, stainless steel, copper and brass, as well as timber, fibreglass and plastics.

E-Z Chamfer prevents sparks and burns. When used correctly at low RPMs the tool will not overheat the workpiece. Threads and burrs are sheared off creating the perfect chamfer for starting a nut or threading die.

E-Z CHAMFER

EARTH ROD DRIVER SDS PLUS SUITS 12.7-19.0mm RODS

- Put the sledge hammer away!
- The Bordo Earth Rod Driver allows electricians to easily drive earth rods, grounding rods, lightning rods, earth stakes, and pegs up to 19mm dia.
- For use with rotary hammer drills fitted with a SDS-Plus chuck, it provides a quick and efficient solution for driving earth rods deep into the ground.
- For optimal efficiency switch the drill to hammer only- no rotary.
- Suitable for use with copper-bonded (copper clad/plated) earth rods and stainless steel earth rods – blunt, pointed and threaded.

CARABINER & 1/4" HEX QUICK CHANGE HOLDERS

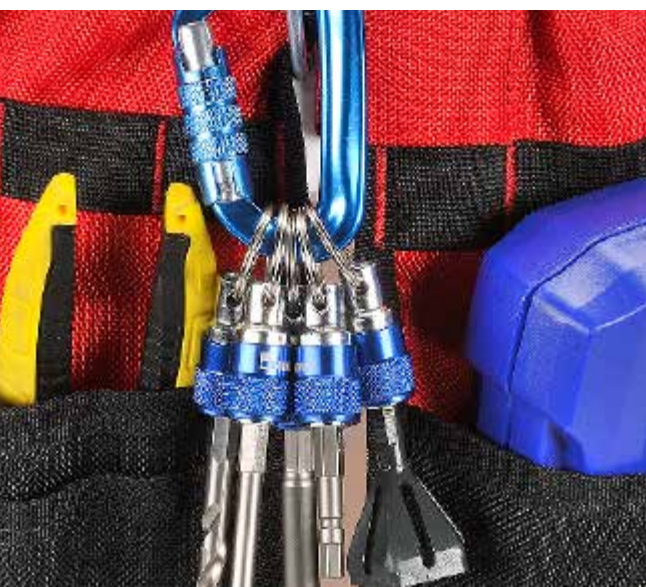

SUITABLE FOR USE WITH ALL 1/4" HEX SHANK ACCESSORIES

- Keep your most often used hex shank accessories just a click away.
- These heavy duty quick change holders securely grip any standard 1/4 hex shank accessory.
- Clip it to your tool belt, tool bucket or even a belt loop on your pants and your favourite accessory will always be in easy reach.
- 150kg Extra Heavy Duty Carabiner.

Non-loadbearing carabiner. Must not be used for climbing. Not certified as personal protective equipment (PPE) against falling.

STAINLESS EDC DROP POINT FOLDING KNIVES

- Lightweight, durable and compact
- Smooth flip-out action with blade lock
- Ultra glide bearing
- Ergonomic moulded handle
- Ambidextrous thumb stud
- 3-1/2" 88mm coated blade

SAFETY KNIFE ABS PLASTIC AUTO RETRACTING 1010-PSK

- Automatic blade retraction.
- Heavy duty ABS plastic construction.
- Non-slip thumb slide.

MVRK SLIDER AUTO LOAD INDUSTRIAL UTILITY KNIFE 1010-A

- Retractable super smooth slider.
- Easy blade change.
- 5 blade storage compartment.
- Industrial tough all metal construction.
- Ergonomic high grip handle.
- Supplied with six blades.

MVRK COMFORT GRIP UTILITY KNIVES

- 1010-UN24G, 1010-UN24O, 1010-UN24Y
- Heavy duty aluminium alloy construction.
- Tradesman tough.
- Extra wide body with rubber grip designed to reduce hand fatigue during prolonged use.
- Super smooth blade guide.
- Integrated strap cutter.
- Supplied with three blades.

\$51.00
Part No. 1011-T100-BD

DUAL GEAR RATCHET PIPE CUTTERS – TWO SIZES

- Fast and clean cutting teflon coated stainless steel blade holds a very sharp edge and has high abrasion resistance.
- Suitable for cutting: PVC (polyvinyl chloride), CPVC (chlorinated polyvinyl chloride), PVF (polyvinylidene fluoride or polyvinylidene difluoride), PB (polybutylene), PE (polyethylene), PP (polypropylene) and PEX (cross-linked polyethylene) pipe and conduit, tube and hose.

MULTI ANGLE MITRE SHEARS

- Precision ground premium quality SK5 carbon steel blade holds a very sharp edge and has high abrasion resistance.
- Suitable for cutting: carpet gripper, setting block for glass installation, thin timber moulding, plastic horseshoe packers, PVC and timber concrete formwork fillets, conduit and more.

PRO-SERIES BI-DIRECTIONAL JAB SAW – 170MM BLADE

- Ultra sharp impulse hardened cross cut teeth stay sharp for longer.

STUBBIE EDC COMPACT FOLDING KNIFE

- Smooth flip-out action with blade lock.
- Integrated bottle opener.
- Captive magnet.
- 40mm blade.

\$18.20
Part No. 1010-B

The MVRK Stubbie ultra compact EDC Knife is small in size but big on features. The strong magnet ensures it stays where you left it- on the fridge, the trailer or stuck to the 4WD. The heavy duty bottle opener ensures you never get caught short. An ultra glide bearing system allows smooth, easy, manual opening without the need for mechanical assist.
